CYBERNETICS

Volume 11, Numbers 1-6, 1975

(A translation of Kibernetika)

Volume 11, Number 1 January-February, 1975

	Eng./Russ.	
Algorithm of Determination of Pair Combinations in Finite Graphs – A. D. Korshunov	1	1
Self-Dual Transformations in Multivalued Logics – I. É. Strazdin'	10	9
An Approach to the Problem of Syntactic Analysis – K. O. Topol'yan	24	22
Generalized Finite Generators and Identity Problems in Definitive Algebras of Regular Events – L. P. Lisovik	28	25
Superpositions of Automaton Mappings – S. V. Aleshin	34	29
Adjacent Coding of Vertices of a Graph – V. V. Yaremenko	40	35
Undecidability of the Immortality Problem for Turing Machines with Three States – Yu. V. Rogozhin	46	41
Diagnosable Automata – I. K. Rystsov	50	44
Operational Automata with Attached and General Microoperations – G. I. Novikov	54	48
Programming Compatibility of an Electronic Computer and Methods for Realizing It – E. L. Yushchenko and S. L. Pogorelyi	61	54
Realization of Various Dialogue Modes of Operation of the User in the "PROEKT" System – O. D. Felizhanko	72	64
Emulation – A Circuitry-Programming Method for Providing Programming Compatibility – É. V. Kovalevich, M. P. Kotov, and M. S. Margolin	76	68
Allocation of Segmented Virtual Memory – O. I. Rau	79	71
Programming System for Calculating Physically Different Fields – V. L. Rvachev, A. M. Matsevityi, and A. E. Semenova	85	77
DDL Translator – M. I. Prigarin	89	80
Mechanically Independent Compiler from ALMO Language. Part A – S. S. Kamynin, N. A. Konovalov, and V. A. Semyachkin	94	85
Method of Design of Automata That Realize a Given Set of Experiments – R. N. Trofimchuk	100	90
Quasirecursion Operation and the Problem of Syntactic Analysis – V. S. Protsenko	105	94
Asymptotic Estimate for the Mathematical Expectation of the Number of Elements in the Pareto Set – V. M. Ivanin	108	97
Algorithm for the Simultaneous Solution of the Direct and Dual Problem of Convex Programming in a Banach Space – V. A. Gnatyuk	114	102
Queueing Systems from the Class $\langle G_I, G_I(\eta), E(\eta)/m, 1\rangle$. Part II – I. Z. Gabrovski, I. I. Ezhov, and A. M. Zakharin	122	108
Conditions for Coincidence of Local and Global Extrema in Optimization Problems – T. T. Arkhipova and I. V. Sergienko	129	113
Derivation of the Necessary Conditions for an Extremum in the Optimal Control Problem – P. I. Mysovskikh	132	116
Numerical Methods of Construction of Optimum Plans for Regression Experiments – V. V. Fedorov	143	124
Graph Optimization Model in Priority Problems – V. G. Vizing	151	131
Single-Step Bayesian Search Method for an Extremum of Functions of a Single Variable – A. G. Zhilinskas	160	139
Grundy Games under Conditions of Semidefiniteness – V. N. Stepanenko	167	145

Engl./Russ.

BOOK REVIEWS

Yu. G. Antomonov and Kh. K. Kadyrov. Synthesis of Mathematical Models of Biological and Medical Systems – Reviewed by E. T. Golovan' 173 150

Volume 11, Number 2 March-April, 1975

Immortality Problem for Post Machines – Yu. V. Rogozhin 177 1

Decomposition of Probabilistic Automata – A. Kh. Giorgadze and A. G. Safiulina 183 6

Informational Analysis of Cause-and-Effect Networks Represented by Functions of the Algebra of Logic and Finite Automata – Yu. M. Gorskii 189 12

Formal Synthesis and Realization of Automata on the Basis of Standard and Homogeneous Circuits. Part III – A. T. Mishchenko 198 21

Regular g-Orderings and Smith Functions – V. Ya. Burdyuk 208 31

Rate of Convergence of the Stochastic Gradient Method – Z. V. Nekrylova 218 40

Remarks on the Minimization of Nondifferentiable Functions – P. S. Knopov 223 44

Discrete Maximum Principle – N. N. Dzyuba and B. N. Pshenichnyi 226 46

Design of Asymptotic Stability of Linear Systems in the Case of a Zero Roots – A. G. Gabelaya, V. I. Ivanenko, and O. N. Odarich 231 50

Finite-Difference Method in a Stochastic Problem of Optimal Control – L. G. Bazhenov 240 57

Maximal Internally Stable Set of a Graph – S. M. Starobinets 244 61

Capacity-Time Analysis of a Cyclic-Service Queueing System – T. S. Brodetskaya 247 64

Methods for Computing Mutually Inverse Functions – Yu. V. Blagoveshchenskii, B. A. Popov, and G. S. Tesler 252 69

Qualitative Investigation of Some Classes of Stochastic Problems – D. B. Yudin and É. V. Tsoi 257 73

Mathematical Model of Operative Control of the Course of Production – Ya. A. Zinder and V. M. Portugal 264 78

Comparison and Classification of Programming Languages – L. P. Babenko, V. D. Rogach, and E. L. Yuschenko 271 84

Properties of Extensible Programming Systems in the PROEKT System – N. M. Mishchenko 279 91

Concerning the Unification of Programming Languages – A. S. Markov 283 95

Methods of Forming Concepts with a Computer (Review) – V. P. Gladun and N. D. Vashchenko 295 107

Theoretical Bases for Design of Automatic Systems for Solving Problems of Transforming Homogeneous Blocks of Information – T. Gergei, A. M. Dovgyallo, and S. P. Kudryavtseva 302 113

Use of the Decrement Vector Method for Solving Certain Problems in the Organization of the Computational Process in Computer Systems with Simultaneous Users (Multiprogramming) – T. T. Arkhipova, V. A. Roshchin, and I. V. Sergienko 315 124

Concerning Hybrid Programs for Hybrid Computers – V. G. Mishutin 320 129

Features of the Implementation of Algorithmic Languages in Minicomputers – N. S. Abramenko and T. F. Slobodyanyuk 329 137

Duality in Two-Stage Stochastic Programming and a Stochastic Linear Production Model – A. I. Yastremskii 333 141

Queuing System with Variable Number of Channels – T. K. Kukhta and N. D. Shvab 338 146

SCIENTIFIC INFORMATION

International Conference on Information Processing (Warsaw, April, 1975) 341 149

Second All-Union School on Neurobionics (Kiev–Zhukin, July 1-7, 1974) – K. A. Ivanov-Muromskii 342 149

Eng./Russ.

Partitioning a Graph into the Minimal Number of Complete Subgraphs – A. P. Ryzhkov 939 90
Certain Properties of V-Voting Algorithms – Z. V. Bagranovskaya 944 94
Regenerative Processes with Embedded Regeneration Periods and Their Application to the Investigation of Priority Queuing Systems – V. V. Rykov 954 105
Bayes Estimates of Markov Process Parameters – É. K. Shpilevskii 961 112
Optimal Control with Partial Interaction of Two Markov Processes in Discrete Time – N. V. Andreev, D. V. Karachenets, and G. É. Massal'skii 970 120
Probabilistic Rounding of Numbers and Aspects of Its Application in Computer Mathematics and Engineering – V. S. Gladkin 978 126
Estimation of the Parameters of the Correlation Function of a Stationary Random Process – T. M. Tovstik 983 131
Computation of the Stationary Probability of a System Being Found in a Predetermined State – G. G. Gul'chuk, N. I. Kirilyuk, and L. B. Malanyuk 991 137

BRIEF COMMUNICATIONS

Estimating a Nonlinear Regression Parameter by Stochastic Approximation – P. S. Knopov 995 141
The Construction of Optimal Hamiltonian Cycles in Multivertex Graphs – Zh. N. Zaitseva and M. E. Shtein 998 143
Optimal Choice of Checking Sequence for Computer Devices – G. A. Donets and I. I. Popov 1001 145
Diagnostic Vector Sequences for a Special Type of Combinational Circuits – V. A. Pepelyaev 1003 146

SCIENTIFIC INFORMATION

Fourth International Joint Conference on Artificial Intelligence (IV IJCAI) – Z. M. Asel'derov and V. F. Kostyrko 1006 149
